Profile Summary

Computer Science Engineering student specializing in Artificial Intelligence with experience in full-stack development, AI applications, and backend systems. Proficient in C++, Java, and the MERN stack, seeking Software Development Engineer opportunities to build scalable and impactful software solutions.

Skills

- **Programming Languages:** C , C++ , Java, Python , JavaScript
- **Tools:** Git, GitHub, VS Code, Figma .
- **Databases:** MySQL , MongoDB
- **CS Fundamentals:** Data Structures & Algorithms, Operating Systems, DBMS, OOPs.

Experience

Software Developer Intern | Avis Pixel Pvt. Ltd.

Feb 2026 – Jun 2026

- Collaborated on developing ERP modules with role-based access control (RBAC) and workflow automation for notices, leave requests, and document approvals.
- Assisted in backend development, database management, and UI enhancements to improve system usability and performance.

Projects

1. TCP Based Chat Application:

- Built a Java-based chat system using Object Streams over TCP sockets with multi-client support via a threaded server architecture.
- Implemented MySQL-backed message persistence and used Bash scripts for Linux-based deployment and testing.
- **Tech Stack:** Java, MySQL, TCP/IP, Bash Scripting, Multithreading.

2. Insight - Personalized Content Delivery Engine| [GitHub](#)

- Architected a scalable content aggregator that filters global news streams based on multi-layered user preferences (Country + Topic + Search Query).
- Integrated **Redis caching** to reduce redundant API calls and improve response times.
- Developed secure RESTful APIs using MVC architecture with JWT authentication and centralized error handling.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Redis, JWT.

3. Farmiq - Digital AgTech Platform | [GitHub](#) | [Farmiq Live Demo](#)

- Developed Farmiq, a full-stack web platform built with React.js, Node.js, Express, and MongoDB to provide farmers with localized agricultural resources, advisories, and tools.
- Developed a crop disease detection service that diagnoses 28 diseases from leaf photos with 97% accuracy and highlights affected areas for the farmer.
- Implemented farmer-focused tools including a crop calendar, agricultural officer directory, and government scheme finder, with native multilingual support in Marathi, Hindi, and English.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, Python, PyTorch, FastAPI .

Education

Vishwakarma Institute of Technology, Pune | (2024 - 2027)

Bachelor of Technology, Computer Science and Engineering (Artificial Intelligence)

CGPA: 9.13

Government Polytechnic, Dhule | (2021 - 2024)

Diploma in Computer Engineering

Score: 91.20%

Certifications & Achievements

- [AWS Cloud Technology Consultant](#) – Coursera | 2026
- [Introduction to Cybersecurity](#) - Cisco | 2025
- Top 5 Finalist in the Biryani By Kilo National Case Study Competition.
- Winner of 4 Hackathons, including national-level competitions.
- Participated in 10+ Hackathons, building innovative solutions across AI, Web Development , and Agritech.
