Profile Summary

Computer Science Engineering student specializing in Artificial Intelligence with experience in full-stack development, AI applications, and backend systems. Proficient in Java, and the MERN stack, seeking Software Development Engineer opportunities to build scalable and impactful software solutions.

Skills

- **Programming Languages:** C , C++ , Java, Python , JavaScript , PHP
- **Tools:** Git, GitHub, VS Code, Figma , Claude .
- **Databases:** MySQL , MongoDB
- **CS Fundamentals:** Data Structures & Algorithms, Operating Systems, DBMS, OOPs.

Experience

Software Developer Intern | Avis Pixel Pvt. Ltd.

Feb 2026 – Jun 2026

- **Worked as a Software Development Engineer Intern**, building and enhancing enterprise web application modules using PHP, MySQL, and MVC.
- **Contributed to backend development, database integration, workflow optimization, and application security**, improving overall system reliability and maintainability.

Projects

1. Retail ERP & POS Invoicing System (Sponsored Project)

Tech Stack: Electron.js, React, TypeScript, Prisma, SQLite

- **Engineered an offline-first desktop ERP and POS system** supporting high-speed barcode/IMEI scanning, automated A4/thermal GST invoice printing, and multi-mode checkout (GSTIN, NEFT/RTGS UTR tracking).
- **Designed robust inventory and financial ledgers** using atomic **SQLite transactions** via Prisma, ensuring zero data inconsistency across **10,000+ serialized handset IMEIs** during concurrent sales.
- **Automated tax compliance and sales analytics** with 1-click GSTR-1/GSTR-2 Excel exports, **automated WhatsApp receipt** dispatch, and role-based access control (Admin vs. Staff).

2. Insight - Personalized Content Delivery Engine | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Redis, JWT, Gemini API.

- **Architected a full-stack personalized news briefing platform** using the MERN stack with JWT authentication, MongoDB user preferences, and AI-powered article summarization.
- **Optimized backend performance using Upstash Redis Cache-Aside caching**, reducing NewsAPI requests by **80%** and improving API latency by **~90%** (from **~500 ms** to **<50 ms**).

3. Farmiq - Digital AgTech Platform | [GitHub](#) | [Farmiq Live Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, PyTorch, FastAPI .

- **Developed a full-stack farmer welfare platform** integrating government schemes, crop advisories, multilingual support, and district-wise agricultural officer directories.
- **Developed a crop disease detection service** for identifying **28 crop diseases** and providing treatment recommendations, with multilingual support.

4. TCP Based Chat Application

Tech Stack: Java, MySQL, TCP/IP, Bash Scripting, Multithreading.

- **Built a Java-based real-time multi-user chat application** using **TCP sockets** and **multithreading** to enable concurrent client-server communication.
- **Integrated Java Swing and MySQL (JDBC)** for an interactive desktop interface and persistent chat history with server-side message broadcasting.

Education

Vishwakarma Institute of Technology, Pune | (2024 - 2027)

Bachelor of Technology, Computer Science and Engineering (Artificial Intelligence)

CGPA: 9.13

Government Polytechnic, Dhule | (2021 - 2024)

Diploma in Computer Engineering

Score: 91.20%

Certifications & Achievements

- [AWS Cloud Technology Consultant](#) – Coursera | 2026
- [Introduction to Cybersecurity](#) - Cisco | 2025
- **4× Hackathon Winner** (including national-level events) , Top 5 Finalist, Biryani By Kilo National Case Study Competition
- **Open Source Contributor, GirlScript Summer of Code (GSSoC) 2025** – Collaborated on community-driven projects, delivering feature enhancements and code improvements.
